

## Martin Hauer

Martin Hauer finished his study on Eco Energy Engineering at Fachhochschule Wels, Austria in 2009. From 2009 to 2011 he was working at General Electric, Jenbach at the development of a Measurement procedure for particles in the flue gas of large gas Engines. Since 2011 he is engaged at the chair of Energy Efficient Buildings and Renewables at the University of Innsbruck as ResearchAssistant and PhD Student. His main focus is on complex thermal simulations of buildings and HVAC technology partly coupled to other areas like natural and artificial lighting He is also active in several EU Tempus and Erasmus+ projects.
