

### 3.1.2 Clinical citations

The total number of documents associated with good health and wellbeing published in the year 2023 was **152 documents**. This number was retrieved from the total number of published documents after filtering for the following subjects combined: medicine, biochemistry, genetics, and molecular biology, nursing, pharmacology, toxicology and pharmaceuticals, health professions, psychology, neuroscience, immunology, microbiology and dentistry. The individual abstracts for the 152 documents were examined to ensure they were all health-related. Of them 32 documents were excluded, the remaining **120 documents**. Of the 120 documents, **the total number of documents that were cited following publication was 84 documents**. **The total number of citations for these 84 documents from 2023 to the date preparing this report was 1218 citations.**

**120 Paper**  
**1218 Citations**  
**10.15 citation / publications**
