

## SDG6: CLEAN WATER AND SANITATION

### 6.1 Research on water

#### 6.1.1 Clean Water and Sanitation: CiteScore

Isra University is actively engaged in research aimed at optimising water consumption through innovative systems. Currently, there are approximately 66 research studies related to SDG 6, with 21 published between 2022 and 2023.

Approximately 25% of the publications published between 2022 and 2023 are in the top 10% of journals, according to the CiteScore metric. The table shows the journals where the publications between 2022-2023 are published along with the Highest percentile according to Scopus.

| Highest percentile | Journal Title  | Number of publications |
|--------------------|--|------------------------|
| 98%                | Chemosphere, <b>2023</b>   | 3                      |
| 86%                | International Journal of Environmental Research and Public Health, <b>2023</b> | 1                      |
| 83%                | Arabian Journal of Chemistry, <b>2023</b>                                      | 1                      |
| 82%                | Heliyon, <b>2023</b>   | 1                      |
| 52%                | Magnetochemistry, <b>2023</b>  | 1                      |
| 50%                | Sustainable Water Resources Management, <b>2023</b>                            | 1                      |
| 40%                | International Journal of Environmental Science and Technology, <b>2023</b>     | 1                      |

| Highest percentile | Journal Title  | Number of publications |
|--------------------|--|------------------------|
| 95%                | Journal of Environmental Management, <b>2022</b>           | 1                      |
