

SDG14: LIFE BELOW WATER

Unlike many nations with extensive coastlines, vast bodies of water, or meandering rivers, Jordan is remarkably devoid of oceans, seas, lakes, or rivers. Therefore, Isra University's limited achievements in SDG 14 can be attributed to its geographical constraints regarding water bodies.

14.1 Research on life below water

The absence of these natural elements diminishes the opportunities for research and development programs to address pressing environmental issues. There are few published studies in the SDG 14, as indicated in Scopus data base.

Sustainable Development Goals 2023

New: See at one glance Sustainable Development Goals mapped to this organisation

Sustainable Development Goals (SDGs) are specific research areas that are helping to solve real-world problems. Elsevier data science teams have built extensive keyword queries, supplemented with machine learning, to map documents to SDGs with very high precision. Times Higher Education (THE) is using Elsevier SDG data mapping as part of its Impact Rankings. [More about SDGs](#)
